Gentlemen:

Subj : FACILITIES CERTIFICATION IN ACCORDANCE WITH MIL-STD-1687

A Naval Sea Systems Command facility audit was performed by our representative from CDNSWC in June, 1998 at your thermal spray coating company to determine compliance with MIL-STD-1687 specification requirements for the performance of thermal spray coating application to U.S. Navy ship machinery component repair and restoration.

The audit was successful and your facility was found to operate in complete compliance with MIL-STD-1687. Based on the audit results your facility is hereby granted Navy certification for performing thermal spray coating applications on Navy ship parts within the limitations imposed by MIL-STD-1687. Future periodic random evaluations will be conducted at your facility by authorized NAVSEA representatives to assure continued specification compliance.

Sincerely,

A handwritten signature in black ink, appearing to read "C. L. Null", written over a white background.
